

## DRL SERIES

DRL series is metal surface polished and wire drawing (HL). Various metal surface treatments, simple operation. During processing, the polishing roller rotates at high speed and swings left and right to achieve the required processing effect.

### PRODUCT DESCRIPTION

Polishing roller: The polishing roller rotates (rotates) at high speed and swings left and right to make the surface of the workpiece smooth and round and can draw the metal surface. The equipment is used for: stainless steel, aluminum plate, copper plate drawing laser cutting parts, stamping parts, water jet cutting, plasma cutting Surface drawing and polishing of parts and flame-cut parts.

### Parameter :

DRL  
.....  
SERIES

Processing width	600mm 800mm 1000mm 1300mm 1600mm
Processing thickness	0.5-100mm
Feeding-table adsorption method:	strong permanent magnetic adsorption (minimum workpiece size $\geq 20 \times 20$ ), vacuum adsorption (minimum workpiece size $\geq 50 \times 50$ ), semi-magnetic adsorption and semi-vacuum adsorption
Automatic thickness setting device:	four-column connecting rod synchronous lifting, lifting servo motor, lifting accuracy $+0.01\text{mm}$
Processing speed	conveying speed 0.8m-9m/min (variable frequency adjustable)
Polishing roller speed	2.2-11m/sec (variable frequency adjustable)
Swing speed	9-20r/sec (variable frequency adjustable)
Complete machine plc control touch screen adjustment parameters	
Equipped wet industrial dust collector or pulse flame retardant dust collector to handle dust and achieve safe and environmentally friendly production
